Welcome to Moody! This guide will help you to connect to mbiwireless on your **Windows 7** devices. If you have a different operating system, please refer to its.moody.edu to find the correct guide for your operating system. These instructions assume that you have installed all available updates and that you have a fully functional antivirus software installed. Failure to meet these security requirements may result in delays in connecting your device to the network.
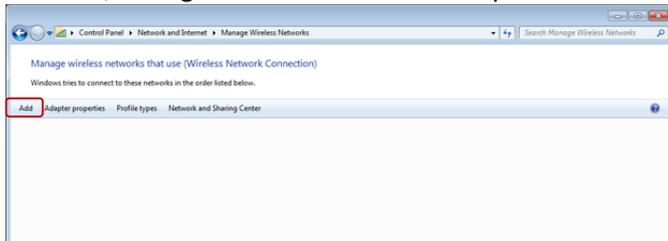

|	
Step 1: Left click on the wireless icon in the lower right-hand corner of your screen and left click on *Open Network and Sharing Center*.	**Step 2:** After clicking on *Open Network and Sharing Center*, you will see a box like the one below. Click on *Manage wireless networks* in the left-hand column.
Step 3: The next screen displays the wireless networks you have connected to before. In this case, you need to either add **mbiwireless** or make sure it is on the list. This guide assumes you have not added **mbiwireless**, so if you have **mbiwireless** in the list, highlight it and click **Remove**, then go ahead and click *Add* to proceed.	**Step 4:** Upon clicking *Add*, the window below will display. Click on *Manually create a network profile* to setup the **mbiwireless** network.
Step 5: In the *Network name* field, enter **mbiwireless** and from the drop-down menu next to *Security type*, select **WPA2-Enterprise** and click *Next*.	**Step 6:** After you have successfully added **mbiwireless**, click on *Change connection settings*:

|	
Step 7: From the mbiwireless Wireless Network Properties box, click on the *Security* tab up at the top. From that same box, click on the **Settings** button next to *Microsoft Protected EAP (PEAP)*.	**Step 8:** After the Protected EAP Properties box comes up, the Validate Server Certificate box should be ***unchecked*** as shown below:
Step 9: After unchecking the Validate Server Certificate box, you need to click on the **Configure** button to bring up the Password Configuration box:	**Step 10:** Close (by clicking *OK*) on all the boxes that are up on your screen. Once every other dialogue box is closed, you will see a dialogue box asking for additional information. Click on it to bring up a box asking for your credentials to authenticate to the network. You will enter your Moody-issued *username* and *password* to continue.
Step 11: You should now be connected to **mbiwireless,** and the wireless icon in your task bar should be as seen below. *NOTE: The following page and steps are applicable only to those who either have been off the network 45 days or more or have never registered with Bradford.*	**Step 12:** To continue with your computer's setup, you will need to open up your browser (Internet Explorer, Mozilla Firefox, etc.). Upon opening your browser, you should be redirected to our *Acceptable Use Policy*. In order to continue, you will need to click **Agree.**

Step 13: The page that comes up after clicking **Agree** is the Welcome page. Click on the **Start** link to the right of *MBI Staff and Student*.	**Step 14:** After clicking **Start**, you will be brought to a Login page. Here, you will enter your Moody-issued *username* and *password* (the same as you entered earlier to join **mbiwireless**) and click **Next** to continue.
Step 15: Clicking **Next** will start a process of downloading *Bradford Persistent Agent,* which scans your computer to make sure you have an up-to-date antivirus program and an updated operating system. This acts as a security measure to make sure we don't get any viruses through and on to our network. Click **Save File** to begin downloading Bradford. *NOTE: Do not close your browser window yet.*	**Step 16:** After clicking **Save File**, your "Downloads" list will come up, and **Bradford Persistent Agent.exe** will be at the top of the list. Double click on the Bradford icon if the download doesn't automatically open. *NOTE: This step differs from browser to browser*
Step 17: The *Bradford Persistent Agent Setup Wizard* will help you through the process of setting up Bradford. Click **Next** to allow Bradford to begin installing.	**Step 18:** You will need to wait a few seconds for Bradford to finish installing.

Contact: its@moody.edu or 312-329-4067
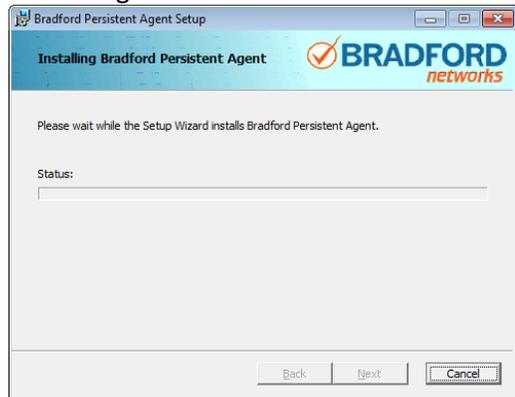

Step 19: When Bradford has successfully installed you can click *Finish*. Then, a box will pop up asking for you to sign in; enter your Moody-issued *username* and *password* here and click on *Login* to continue.
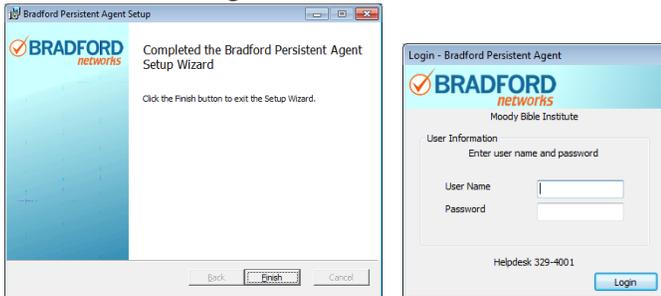

Step 20: After clicking the *Login* button, Bradford will prompt a scan of your system. This scan of your computer is to ensure your computer meets our security policy. *Please wait until the progress bar reaches its full capacity to proceed*.
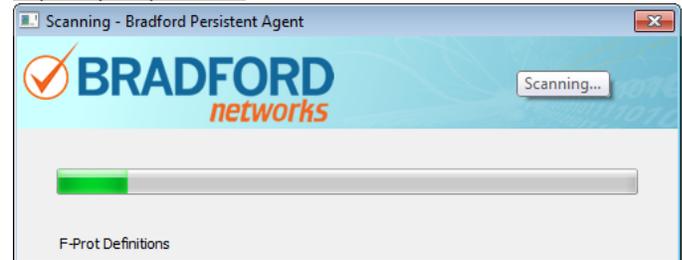

Step 21: Once the scan has successfully completed (success happens when your operating system and antivirus program are completely up to date), your browser will display a *Success* page. You will need to *wait 45 seconds before your connection is completely established*.
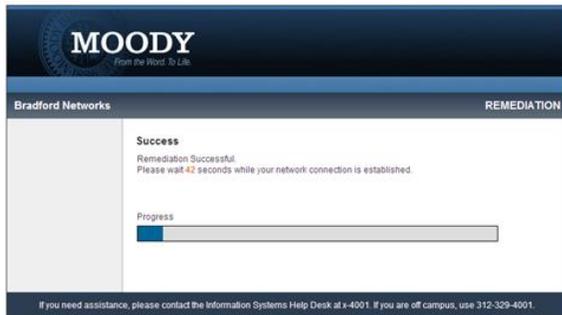

Step 22: When this process has finished, a window will pop up requesting that you *close and reopen your browser*. Close your browser completely, reopen it, and navigate to your favorite Web page.

Congratulations, you should now be connected to our network!
